COLEMAN WELCOMES MINING CONGRESS DELEGATES

The New Tipple, International Coal & Coke Co., Ltd.

View of the International Coal & Coke Co., Ltd. steel tipple and pneumatic coal cleaning plant completed last year. It is fire resisting throughout, being constructed of concrete and steel, and cleans and sizes the coal. This company has put out over 3,000 tons in one day, 53,000 tons in one month, and 484,000 tons in one year, and the property is developed and equipped to maintain these figures should the market demands require it. Mr. O. E. S. Whiteside is the general manager of this company.

Elks Carnival Proved Very Successful

Three Nights Fun and Pleasure Participated in by Townspeople...Everybody Happy

Coleman Elks have added another carnival success to their record in the three days effort which closed on Tuesday night, and it is safe to say that through the support given them by the public in their worthy efforts, they will have a neat sum to be used for various purposes.

Despite the fact that there were counter attractions elsewhere, Coleman people stood loyally by their own carnival, and there was a splendid attendance every evening, though it was cut down somewhat on Tuesday evening owing to the rain.

But this did not deter the enthusiastic boosters at the various booths from maintaining their pep and vim, and they made the air resound with their cries and exhortations to "try your luck," and so beguile the nimble quarters from the pockets of the onlookers. The interior of the Arena rink had been made very attractive with spruce boughs and streamers of various colors around the booths, giving a real carnival atmosphere, and the bright lights and exhilarating music could not fail to bring out the people to this centre of activity.

Everybody has a touch of the gambling spirit at a carnival, and on Saturday night it opened with a swing which equalled former occasions. Despite the fact that the inines have been working only part time in recent weeks, it was indeed surprising the way in which the public took their chances and tried to win a prize at the various wheels of fortune. Bridge lamps, blankets, ham and bacon and the lesser articles, such as cigarettes, chocolates, umbrellas, fancy dolls, etc., furnished a wide choice for lucky winners, while "Bingo" and "Jingle," and the racehorses gave those who wished to have a little longer run for their money than just the spin of the wheel plenty of opportunity to try their luck.

The Elks carnival committee and their willing helpers are to be com-

mended for their efforts. They all worked and well deserved the success which was theirs.

Great Coal Belt

Crow's Nest Pass is the great coal belt of southwestern Alberta and hundreds of thousands of tons of high grade steam coal are shipped every year to the prairie provinces and Winnipeg and Kenora, Ont.

Marathon Road Race Won by Raymond Blake

Nine Entries in Bellevue Sports 5-Mile Race on Monday-Favorites Takes Second

The event that excited the most interest in the athletic program at Bellevue exhibition sports on Monday was the five-mile race, the starters lining up at 12:30 and running 1½ miles east on the highway, through Bellevue, and 1½ miles west and return. On the first lap two dropped out, and Kerr, who was leading at the 2½ miles, despite being accidentally tripped and sustaining cuts on his knuckles, maintained his lead till the last mile of the home stretch was entered, when Raymond Blake put on speed and left Kerr behind, finishing 28 seconds ahead of him. Blake's time was 32 minutes, 41 seconds. Third place was scored by Liberal fourth, 36 min., 47 seconds; Russell fourth, 36 min., 20 seconds; Connors fifth, 35 min., 25 seconds. The two remaining runners did not finish. The time was slower than the road race at Blairmore this summer, owing to the part of the race being run quite a steep incline, and Blake's victory came as quite a surprise to the backers of Kerr, who had confidently looked to his winning, and who himself felt confident of winning. Blake allowed him to make the pace throughout, then in the last mile just shot right ahead and finished in fine style. There were rumors of a protest being entered, owing to Kerr's fall, but no action was taken, and the presentation of the cup and prizes was made by G. A. Vissac, general manager of West Canadian Collieries, who complimented the runners for their sportsmanship and hoped they would be competitors again next year. Three cheers were given for the competitors who bimbingly acknowledged the compliment with broad smiles.

Crow's Nest Pass Towns Hosts to Distinguished Gathering of Mining and Metallurgical Congress Delegates on Their Tour Across Canada--Mining Men From All Parts of the British Empire Among the Visitors--Will Visit Plants of International and McGillivray Companies Here; West Canadian Collieries at Blairmore and Bellevue, and Hillcrest Collieries Ltd.

Arrive at Blairmore Friday Afternoon

Visiting Party Includes Distinguished Mining Men From All Parts of Empire

To-morrow (Friday) over 300 mining experts, capitalists and others interested in the wonderful development of Canada's mining industry will visit the Crow's Nest Pass, half of the party spending the day at Fernie, B.C., and the others arriving at Blairmore at 2:35 p.m., to visit the mines at Blairmore and Coleman.

The countries represented besides Great Britain, are South Africa, Australia, India, Belgium, Eastern Siberia, Tasmania, Czechoslovakia and France. This is the second triennial congress of the Institute of Mining and Metallurgy of the British Empire, and is the result of a decision reached following the war, the first meeting of its kind being held in England when it was decided to hold the congresses in various countries of the Empire in order that the members might have the opportunity of seeing at first hand the mining development in other lands. Canada is fortunate in being chosen as the meeting place of the second congress, which opened at Montreal about two weeks ago, and half of the party went east through the Maritime provinces, the other half, travelling on the Red and Blue specials, coming west, travelling as far as Victoria, B.C., thence up to the northerly mining district of British Columbia and back east via Edmonton.

The holding of the Second Triennial Empire Mining and Metallurgical Congress in Canada should contribute greatly to increase outside interest in Canadian mining progress. Tours have been arranged which will take the visitors through to the Pacific Coast and as far east as Newfoundland. Most of the leading mineral areas will be inspected. It may be presumed that this close-up view of one of the Dominion's greatest industries will

Western Steam Coal Is Very Efficient

Crow's Nest Pass Coal Called on to Perform Most Difficult Work for C.P.R.

The August issue of the Coal Review states: "In commenting upon the efficiency of Canadian steam coal, and their suitability for all power purposes, J. R. Smith, business superintendent, West Canadian Collieries, Limited, Blairmore, inscribes a number of large industrial users, which are using coal from the Crow's Nest Pass mines with every success."

He states that in his estimation "the most difficult work any fuel is called upon to perform is that of maintaining 200 pounds of steam in a locomotive hauling a heavy train with all its heating surfaces exposed to 20 degrees to 40 degrees below zero, especially if it is bucking adverse winds and slippery rail."

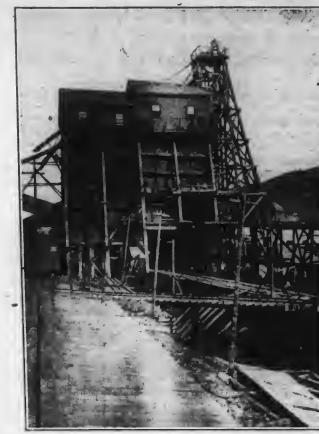

The coals mined from the Crow's Nest Pass are doing this winter after winter, without failure anywhere between Kenora and the Rocky Mountains, and the coal will perform equally well in any stationary plant.

lead to substantial investments later.

Even Canadians scarcely realize the importance and progress achieved by Canadian mines and the value of the annual production. Recent statistics compiled by the federal bureau of statistics show the total investment in Canadian mines to amount to approximately \$632,444,000. Of this about \$252,000,000 is invested in metal mining and in metallurgical works treating Canadian ores; \$250,000,000 in non-metallic mines, and \$91,000,000 in properties and plants producing structural materials and clay products.

An analysis of the capital invested in Canadian mining properties bears out to some extent the recent criticism of Premier Brownlee that British investors were allowing many good opportunities to pass

of the outside capital so invested,

The Old Tipple, International Coal & Coke Co., Ltd.

The old tipple of the International Coal & Coke Co., Ltd., still standing, which was erected in 1903, and through which hundreds of thousands of tons of coal passed during the 23 years of its operation, and which has been superseded by the up-to-date tipple and cleaning plant shown on this page.

\$235,000,000 came from the United States, \$100,000,000 from Great Britain and \$19,000,000 from other countries. It is estimated that at the present time about 53 per cent. of Canadian mining shares are owned by Canadians, about 30 per cent. by Americans and 17 per cent. by British investors.

Visitors To-Morrow

Mr. Whiteside, general manager of the International Coal & Coke Co. Ltd., returned this morning from Calgary, and states that there will be 135 visitors in the party on Friday, including 35 ladies. Coleman Board of Trade will co-operate in extending a hearty welcome to the visitors.

W. R. Kell, manager and editor of the Western Canada Coal Review, who has been on a tour of the mines in the Crow's Nest Pass, was an interested visitor yesterday at the International Coal Co. plant.

No. 1 Troop Boy Scouts will meet in St. Alban's hall on Tuesday, September 13th at 8 p.m. Important that every scout turn out.

The New Tipple, McGillivray Creek Coal & Coke Co., Limited

The above picture gives a splendid view of the fine tipple and coal cleaning plant of the McGillivray Creek Coal & Coke Co., Ltd. This company, under the management of Mr. Geo Kellock, has been operating here since 1907, when development work was first started, and it has made steady progress through the intervening years. It is developed and equipped to take care of a possible output of 450,000 tons per year, and has a record output for one month of 65,000 tons. The new plant shown above was started in operation in 1926, and is located one mile west of Coleman.

Coleman First Aid Teams at Bellevue

McGillivray Scored Second in Seniors and Coleman No. 1 First in Class B Competition

The First Aid competitions held on Monday at Bellevue in connection with the annual exhibition and sports excited considerable interest and there was a full day's work for the judges, Dr. Groff, Edmonton; Dr. Wake, Pincher Creek; Chief Robert Faulls, Taber, and W. H. Short, No. 1 Fire Hall, Lethbridge. The results of the competitions were as follows:

SENIOR CLASS

1, Greenhill Mine, Blairmore, prizes wrist watches; 2, McGillivray Mine, Coleman, prizes pocket watches; 3, International Mine, Coleman, prizes gold lockets; 4, Bellevue Mine No. 1, prizes fountain pens and pencils; 5, Bellevue No. 2, prizes military brushes.

CLASS A (Boys to 16 years)

1, Blairmore No. 2, Ed. Royle's team, prizes military brushes in solid leather cases; 2, Blairmore No. 1, C. Thomasson's team, gold cuff links.

GIRLS G.I.T. AGE

1, Bellevue, Miss Alice Goodwin's team, prizes French Ivory mirrors; 2, Blairmore, Mrs. Tom Barnes' team, prizes vanity cases with monograms.

CLASS B (Boys 16 to 19 years)

1, Coleman No. 1, prizes wrist watches; 2, Bellevue No. 2, prizes silver watches; 3, Bellevue No. 1, prizes gold lockets; 4, Coleman No. 2, prizes fountain pens and pencils.

The presentation of prizes was made by Chas. Emerson of Bellevue, the total value being approximately \$520.00.

Mrs. D. C. Roberts left on Saturday for Medicine Hat, to take up residence there, after living in Coleman for fourteen years. Mr. Roberts, formerly with the International Coal & Coke Co., Ltd., has taken a position with the Ajax Coal Co., Medicine Hat, and had been with the International here for 20 years.

Now packed in Aluminum, the same as years ago.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good.

Opportunities For Britain In Canada

Great Britain has a problem and Canada has a problem, one being the exact opposite of the other. In the British Isles there is a surplus population for which employment cannot be found. In Canada there are enormous resources and vast areas of fertile lands which call for increased population in order that development may take place. The Old Land has too many people; this New Land has too few.

Looking at the face of things it would seem to be a comparatively simple matter for the British and Canadian Governments to evolve policies under which the surplus population of Great Britain could be transferred to the open spaces of Canada, thus solving the problems of both countries. The solution is not so easy, in fact, it is most complex. It is the geographical type, men and women who will go on land. True, they may not have had actual farming experience, but a willing mind can succeed, but they must be of that class which is likely to make good on the land.

Great Britain, however, has no large surplus of this type. It, indeed, has a surplus at all. The British surplus population is found among the workingmen, artisans and labor class, men and women who, because they cannot obtain steady employment, are obliged to accept the Government dole. Opportunities for the employment of any large number of these people in Canadian industry are small, and it would be most unfair to them to encourage their immigration to Canada where their presence would have an injurious effect on Canadian workers and labor and local prices of articles of consumption. This is the case in Great Britain.

The effects of having the British and Canadian Governments are, therefore, confined to the training of a limited number of immigrants for agricultural pursuits and the proper placing of them on farms in Canada. Welcome as these efforts are, their effect on the respective British and Canadian problems of surplus and unemployed population is almost negligible.

There would seem to be a greater hope of making an effective contribution towards the solution of this joint problem in the adoption of the idea which has been urged of late, namely, that the great expansion in British industry established branch plants in Canada in order to enable them to successfully compete in the growing Canadian market with their United States rivals and that they staff these branch plants with their own workers from the British Isles.

The implementation of such a policy would result in profitable investment of British capital, which would lead to a marked development of the natural resources of this Dominion, would help to adjust the balance of trade as between Canada and the United States, would add to the population of the Dominion probably employed, would ease the unemployment situation in the Old Land, and would increase the productive capacity, the prosperity and wealth of the Empire as a whole.

It will be frankly admitted that the industrial leaders of Great Britain have had to face enormous difficulties during and since the war. The have borne, are still bearing, heavy burdens. They may justly feel that the present is not the time to launch out on new and untried ventures. The situation is, however, that only through the adoption of heroic measures will conditions improve. Old Land must be bettered, and the relief brought to British workers. Further, in view of existing conditions, British industries are looking out in the Canadian market. An effort should be made to hold and strengthen their position here before it is too late.

It is gratifying to note that one big British concern has decided on a great undertaking in the Province of Quebec, an announcement has just been made that British financial interests controlling tens of millions of capital have finally concluded arrangements for the utilization of Southern Saskatchewan lignite coal in the carbonizing and briquetting of this fuel on a large commercial scale and will within the next few months invest hundreds of thousands of dollars in the enterprise.

Premier Brownlie of Alberta and Hon. Chas. A. Dunning have both been urging the adoption of this branch factory policy up the British manufacturer, and it is to be hoped that so astute a business man as Premier Stanley Baldwin himself a big manufacturer, will see the advantages to Britain, to Canada, to the Empire, of such a policy, and urge its adoption upon his fellow manufacturers in the British Isles.

Would Help Aviators

Towns Should Show Their Name Readable From Air

Russian Prince Hints German Monarchy Is Gone Forever

British aviation authorities say the time has come for English towns to erect big signs with the names of the town visible to aviators who hop the Atlantic now with the simplest of navigation instruments and big scale maps.

The request of Edward F. Schiedt and William S. Brock, in the pride of heart of the British, who have the Little South Coast resort of Weston spelt out the name of the town and country on the beach right go the pier, would know what country they had reached, will go down in history as one of the strangest questions ever asked in England.

Minard's Liniment relieves backache

Manitoba's Mine

Current activities in the mineralized areas in southeastern and northwestern Manitoba indicate that the province will soon become a steady producer of gold and possibly an important source of copper and zinc.

Disfiguring Blemishes Healed by Cuticura

Daily use of Cuticura Soap, assisted by Cuticura Liniment, quickly and easily soothes and heals ingrown skin, acne blemishes and irritations on neck and face, but tends to prevent such conditions. Nothing purer, more concentrated or more satisfactory than these dermatological and pharmaceutical emollients.

Sample Each Free by Mail. Address Canadian Dept.: St. John, N.B., Toronto, Ont., or Buffalo, N.Y. Cuticura Shaving Stick \$1.50.

Speaks Several Languages

Secretary Of State For the Dominions
Fingest Lingua in British Cabinet

Mr. L. C. M. S. Amery, the Secretary of State for the Dominions, is unquestionably the fluent linguist in the present Cabinet. He speaks several oriental dialects as well as European languages.

When in Salzburg, Sir George Milne, or "Uncle George," as the C. I. C. was invariably called, asked once of his staff officers if he understood modern Greek. The officer replied that he did not, but that he had a good handbook of Greek and also that he knew a man who was supposed to be quick in picking up languages.

So Captain Milne went out and purchased the handbook. "Can you get the hand of it by next week?" asked Sir George. "Oh, certainly," said the captain. "I am very confident," said Sir George. "Well, you see, I wrote it," replied Captain Amery.

On Ladies' Toes

Are Sore Corns

Quick sore relief is almost instantaneous if you apply Purina's Extraordinaire Foot Ointment to your feet or hands no more.

One single drop of Purina's stops the pain. A few drops make the corn dry up and drop off. Purina's Extraordinaire Foot Ointment relieves it every day. Get a bottle from your druggist. Have a substitute for Purina's.

An application of the ointment relieves the pain immediately and prevents the recurrence of the sore.

Water Power Potential

The present recorded water-power resources of the Dominion will permit of a turbine installation of 41,700,000 horse power. The total hydroelectric installation up to the end of 1925 throughout the Dominion was 4,556,228 horse-power or less than 10 per cent of the recorded water-power resources.

GIRLHOOD DANGERS

Come Through a Weakening Of The Blood—A Tonic Is Needed

It is a well known fact that it is quite common for girls to lose strength, and mothers should always watch the health of their daughters at this time. It is when the body is weak that the girl is most susceptible to disease. There was some suffering and a good deal of want among the poorer people. A local philanthropist organized a public entertainment for their benefit. No admission was charged but a collection was taken at the close of the performance.

The entertainment was a good one and it was thoroughly enjoyed by a crowd who were given the collection taken when it was counted, the amount of the collection was £100.

The collection was a good one and it was thoroughly enjoyed by a crowd who were given the collection taken when it was counted, the amount of the collection was £100.

"The collection," he said, "amounts to three dollars and sixty-seven cents. The proceeds you all understand, are for the benefit of the poor. They seem to be all here!"—YOUTH'S COMPANION.

U.S. Plans To Operate Farm

The days when the horse was depended on to conduct the ranch over his domain passed to the rear of the rancher's few young sons. And the automobile has taken its place. The pioneer exponent of this trend is Jack Fischer, known as the "giving farmer," because he operates his wheat farm, near Spokane, Wash., by air.

Japanes Watermelon

Elephant-pawed watermelons cost five cents apiece in Japan and the fruit is becoming a favorite. Although out of reach of the ordinary price in Japan, melons from Yamato and Shizuoka find ready sale in Tokyo, where almost three hundred tons have been consumed this season.

In all troubles due to wet, watery blood, Dr. Willard's Pink Pills will be found to be most reliable, as all medicine, either oral or salveal, is 50 cents a box by The Dr. Willard Medicine Co., Brooklyn, N.Y.

Goats Across H.L.B. Line

Grazing fields equal to those on the prairies were seen at Mile 42, Cypress Lake, on the Dufferin and Lake Railway by J. B. Guild, superintendent of illustration studios for the Dominion experimental farm, who has returned from an inspection trip over the route. He reports that at other points, grazings are coming along well except at Mile 81, where cutworms have done considerable damage to vegetation. At Mile 12 there is an excellent stand of grass and mannikins alight throughout the area.

The White Pine in Canada

The botanical range of the white pine in Canada extends from the Atlantic ocean to the province of Manitoba. It is confined to the region lymphatic of the running approximately from the southeast corner of lake Winnipeg through lake Nipigon, along the height of land north of lake Timiskaming through lake St. John to Pointe du Mou on the St. Lawrence and Cape Breton island.

National Dairy Council

Mr. W. Y. Stephen, secretary, announced that the ninth annual meeting of the National Dairy Council of Canada will be held at Toronto, on November 21 and 22 next. A number of questions will be up for discussion, including the relationship of dairy to dairyman and dairy manufacturers. The programme will be outlined shortly.

Drives away pain—Minard's Liniment.

Write Dr. Pierce, Buffalo, N.Y., for free medical advice.

Used by physicians—Minard's Liniment.

SELECT SITE FOR MOORING MAST NEAR MONTREAL

Ottawa.—Hon. J. L. Ralston, Minister of National Defence, has announced that negotiations for the purchase of a parcel of land near Montreal, containing approximately one square mile for the site of the mooring mast, have been practically completed. The site selected is that recommended by Major G. E. Scott and A. R. Gibbs, officers of the air ministry, who visited Canada in the early summer to assist in the choice of a suitable location.

It lies on the South shore of the St. Lawrence River, some six miles from the centre of the city of Montreal, approximately four miles from the Langelier Ferry wharf and adjacent to St. Hubert Station on the main line of the C.N.R.

It is part of an open, level plain, well drained, of good surface and in every way suitable for its purpose, the Minister stated.

Uniform Rate Necessary

Present Restrictions Hamper British Immigration Says Dr. Black

Montreal.—"Restrictions which apply to the low passage rate render it difficult, if indeed not impossible, for any considerable number of British people to avail themselves of that route to come to Canada and settle here on the land," said Dr. J. B. Black, director of colonization of the Canadian National Railways, who has returned from Europe.

Dr. Black suggested that a flat rate should be adopted and that such a rate was necessary and that application of such a rate should be without any complex series of restricting regulations.

"Due to the restriction of entry to the United States," said Dr. Black, "Canada now has an opportunity to secure a considerable proportion of the stream of immigration which heretofore has flowed into the United States and which has greatly helped develop that nation during the past 50 years."

Mounties Return From Far Northern Interior

Opened a New Police Post on Liard Lake

Prince Rupert.—After spending four months in the remote regions of the Northern interior during which time they opened a new post of the Royal Canadian Mounted Police at Lower Liard on Liard Lake, Inspector T. V. Sandy-Wunsch, Sergeant Paton and Constable Cooper have returned to Vancouver. With them was John Too, an Indian, who had gone insane in that wilderness, who will be lodged in Esquimalt.

Inspector Sandy-Wunsch, it will be remembered, figure prominently in the recent trials of the Indians who were tried in Prince Rupert two years ago and which resulted in the conviction for manslaughter of Big Alex, who has since been released and returned to the Liard River district.

New Laying Record

Saskatchewan Barred Plymouth Rock Hen Is New Champion

Saskatoon.—A "Barred" Plymouth Rock hen owned by the University of Saskatchewan, has made a new record for egg production.

Over the past twelve years, this new champion has to her credit a total of 329 eggs in 365 days. Not only is this a new record for Barred Plymouth Rocks, but as far as is known it is a new record for all heavy breeds of poultry.

This bird was bred and reared by the poultry department of the University. She is known as H.3403.

Asked To Appear In Movies

London—King George and Queen Mary have been asked to appear in a "speaking movie," which will be shown in London this month in connection with the admiral's full dress silver jubilee review of the fleets of Cunard and Cunard. The talking pictures are expected to be the sensation of the year.

Hus Population Of Millions

Montreal.—In the preface to the annual report of 1926, which has been published and distributed by the city treasurer, are found statistics concerning Montreal which show it to be one of the nine largest cities on the North American Continent with a population of 1,000,000.

W. N. U. 1897

Popularity Of Lindbergh

Seven Million Dollars Involved In Business Offers Since He Made Famous Flight

New York.—Charles A. Lindbergh can have \$1,000,000 by going through a royal marriage ceremony in front of 10,000 guests, and \$6,000,000 more by accepting the business offers tendered him since he made his non-stop trans-Atlantic flight, says the lame eagle's chief secretary, in a popular Science Monthly.

Commander Green, who has completed a check up on mail and other communications to Lindbergh, says that among the 2,500,000 letters and telephone calls and cables received, were at least three proposals that the young flier make an attempt to reach the moon by rocket shot from the earth. Lindbergh also received thousands of proposals of marriage. The aviator's mail included also 14,000 packages.

Lindbergh presents, sent in his mail numbered 5,000 and upwards of \$10,000, were received in return postage. More than 500 "close relatives" asked him "to do something for them." More letters came from women than from men and letters from girls outnumbered those from boys four to one.

Col. Lindbergh answered many of the letters in longhand, but thousands found their way to the waste basket.

New Deukhobor Leader

Son Of Former Leader Leaving Russia For Canada

Vancouver.—Peter Verzhil, new leader of the Deukhobors, second son of the former leader of the Deukhobors, in Canada, leaves Moosonee September 2, for this country, according to word received by a prominent member of the Deukhobor colony near Yorkton. He will sail from Southampton on the Bergengard for New York September 16. Permission for Mr. Verzhil to leave Russia was originally granted to see his father, who died while en route to America two years ago, and many obstacles had to be overcome. Mr. Verzhil will be accompanied by Paul Ivanovitch Brilukoff as travelling companion.

The wheat producing provinces of Western Canada are mentioned separately in the review. In Alberta it is stated very heavy yields are indicated in all parts of the province. No frost or rust damage is evident. Cutting was well under way in the south and just started in the central part of the province. A bumper crop in the Peace River region is indicated. "In fact," says the report, "the province as a whole seems to be ready to harvest a nearly record crop of quality wheat."

Cutting is general in Southern Saskatchewan, but not beginning in the more northerly parts according to the review. In Saskatchewan some injury has been done by frost and rust but this is not likely to cause any great damage. On the whole, prospects in Saskatchewan are for a very good crop with yields somewhat above the average. With respect to the Manitoba wheat situation the bulletin states that about 40 per cent of the wheat crop has been harvested in the southern part of the province and the remainder to be up to par.

In Central Manitoba, the crop is heavy and is being injured to some extent by rust. In the more northerly parts the crop is rather late and may be affected by rust and frost.

The wheat crop in Quebec and Eastern Ontario will be about average. It is stated. In Western Ontario it is considerably better than last year.

Huge Sum For Defence

New York.—The review for valley districts of Saskatchewan and Manitoba both in the prairie west installed expenditure totaling more than \$250,000. Alfonso Feliciano, treasurer and founder of the Boston Defense Committee, announced here.

Sugar Industry For B.C.

New Westminster, B.C.—Arrangements for the establishment of a beet sugar industry in the Fraser Valley by an English company, capitalized at \$2,000,000, have been completed, according to word received by the New Westminster Board of Trade. The company will acquire a large area in the Fraser Valley worked by English and Scotch labor. The plant, it is believed, will be located in New Westminster.

Poultry Congress A Success

Ottawa.—It is now stated by those who had charge, that the third World's Poultry Congress, held in Ottawa from July 27 to August 4, was a greater success than the previous two previous meetings. Forty-two countries sent delegations and live birds numbering 10,000. There were birds from the poultry farms of King George, the Prince of Wales and various reigning monarchs of Europe.

Drink Mora Milk

Milwaukee.—Mrs. Ella Moore, Brooklyn, was re-elected president of the National Women's Christian Temperance Union, in Milwaukee, where the organization has its headquarters. The drinking ban has gained since prohibition went into effect, said Miss Edna A. Marshall, Chicago, in an address before the convention.

ATTEMPT TO CIRCLE THE GLOBE

Here are the latest airmen to fly across the Atlantic, William Broch (Left) and Edward F. Schles. In their Slinson-Detroit plane, similar to the Windham-Windsor and London-to-London dashes, they recently flew across the Atlantic from Newfoundland to England in an attempt to circle the globe in 15 days.

GOOD CROP NOW BEING GARNERED IN PRAIRIE WEST

Public Opinion Against War

Increased Participation Of The Masses In Peace Movements

Vancouver.—Increased participation of the masses of the people in formulating the attitudes of nations toward war has been given as the greatest factor in influencing the Canadian public here, as one of the forces operating against war. He cited as an example that not long ago war seemed possible from the United States and Mexico, but that immediately the chance of conflict became known people from all parts of the country protested to Washington. He said the history of negotiations before other conflict showed that decisions were made on the prejudices of a majority of the people.

John J. Gorham, former congressman, who was commissioned by the Mayor to investigate the text books, said he found "they omit facts and distort and minimize many of the real characters, events and ideals hitherto held sacred to American history."

The report came fast on the heels of the suspension, under charges of insubordination, of William McLean, who was a member of the staff whom Major Thompson has assailed as "the stoolie pomin of King George" and the instigator of alleged anti-American teaching in the schools.

The report came fast on the heels

of the suspension, under charges of

insubordination, of William McLean,

who was a member of the staff whom Major Thompson has assailed as "the stoolie pomin of King George" and the instigator of alleged anti-American teaching in the schools.

Parties Prepare For Election In Ireland

Voting Will Take Place In Free State September 15

Dublin.—All the political parties of the Free State have been devoting their energies the last few weeks to preparations for the legislative elections called for September 15, and the campaign has begun in earnest.

William T. Cosgrave, president of the Free State government, and nearly all his ministers, were to start extensive speech making programs throughout the country.

The Fianna Fail, Republican party of Eamon de Valera, has already nominated its candidates. All the Laborites are re-recognizing their seats and will be reinforced by other candidates. The government has not yet announced its candidates and Capt. William Redmond has given no indication of his plans for the National Party.

Complain About

History Books

Report Says Text Books Used In Chicago Are Pro-British

Chicago.—Histories used in Chicago public schools were indicated as anti-American, pro-British and "biased" in favor of the Canadian Factor, according to an exhaustive report made by Major Thomas.

John J. Gorham, former congressman, who was commissioned by the Mayor to investigate the text books, said he found "they omit facts and distort and minimize many of the real characters, events and ideals hitherto held sacred to American history."

The report came fast on the heels

of the suspension, under charges of

insubordination, of William McLean,

who was a member of the staff whom Major Thompson has assailed as "the stoolie pomin of King George" and the instigator of alleged anti-American teaching in the schools.

Crop Pest Control

Meeting Held At Sisseton To Discuss Problem

Sisseton, S.D.—Delegates representing the prairie provinces, Ontario, Minnesota, Montana, and North Dakota, met at Sisseton in annual conference of the Great Plains Crop Pest committee at the University of Saskatchewan. They were in session here for two days, during which time they discussed problems of control and eradication of farm crop pests.

There have been no very serious outbreaks of pests during the present season, delegates stated at the opening session.

Report Labor Increase

Data Shows Gain In Prairie Provinces During July

Ridge, The Labor Gazette reported that the gross product of the prairie provinces last month the greatest progress in employment were in construction, manufacturing, transportation, service and communications, while logging (in which the movement was seasonal) showed a decline. Data were compiled from 775 employers with an aggregate staff of 118,556 workers, as against 113,998 in their last report.

This increase of 4,558 workers exceeded that registered on July 1, 1926, while the level of employment was higher than on the same date in any other year of the record.

No Increase In Immigration

Ottawa.—According to the Department of Immigration, June brought 18,052 newcomers to Canada as compared with 12,191 in June of last year—an increase of 48 per cent. The total for the first quarter of the fiscal year was 77,434 compared with 48,462 in the corresponding period of 1925—an increase of 60 per cent. Of the June figures 7,272 were British, 2,642 were from the United States and 8,138 from other countries.

"Fore" Replaces War Whoops

Were the stoic old chieftains of the Iroquois still living, they would retain the charm of their old customs and dress, and the delight of the thousands of visitors from all parts of the world who bathe in the waters of the famous mountain resort of Bafta.

But for all the Indians may have acquired from the modern world, they will retain the charm of their old customs and dress, and the delight of the thousands of visitors from all parts of the world who bathe in the waters of the famous mountain resort of Bafta.

This unusual photograph was taken on the scenic course that lies near the junction of the Bow and Spray Rivers, just below the Banff Springs Hotel.

ANTI-SMUGGLING PLANS DISCUSSED AT WASHINGTON

Washington.—The Royal Canadian Customs Commission left for home after holding four formal meetings and several informal meetings with state, customs, coastguard and prohibition authorities here. It was permitted to look into the workings of the United States anti-smuggling measures and to investigate the machinery of the United States customs system.

The Flanna Fail, Republican party of Eamon de Valera, has already nominated its candidates. All the Laborites are re-recognizing their seats and will be reinforced by other candidates. The government has not yet announced its candidates and Capt. William Redmond has given no indication of his plans for the National Party.

The commission will be in Washington until September 15, and will confine itself strictly to inquiry into procedure in the United States and any negotiations for a change in existing agreements between Canada and the United States will be instituted later on by the governments themselves.

Little information has been given out as to what actually happened at the conference here, but in unclassified wire news reports, it is stated that the commissioners had been told that this would make it easier to prevent smuggling both ways and that consular certificates would go far toward minimizing fraudulent invoicing and double invoicing, which methods are now being used to cheat the Canadian Government of revenue.

It is known that United States would like Canada to establish her own consular agents in this country. The commission doubtless has been told that this would make it easier to prevent smuggling both ways and that consular certificates would go far toward minimizing fraudulent invoicing and double invoicing, which methods are now being used to cheat the Canadian Government of revenue.

Noted Explorer Is Slain

Reported That Members Of German Expedition To Interior Of China Are Massacred

New York.—The New York World says Dr. William Fletcher, former staff officer of the German General Staff, was slain and captured, and all of the members of an expedition he was leading, have been reported massacred by natives of the western part of Szechuan province, China.

The World's wireless station picked up a German trans-oceanic wireless press message to the effect that a British resident of Shikkin in the northern part of India, just south of Tibet, had been killed. It is reported that Fletcher and his wife had been killed.

Alleged Spies Arrested

Leningrad, Russia.—The political police have arrested an alleged group of 26 spies, charged with espionage for the British Intelligence service in Finland. Most of the accused, including several women, hold various positions in the army, navy and civil service institutions, and are alleged to be in charge of a British naval captain with headquarters in Finland.

Under Royal Patronage

Calgary.—The Alberta Wheat Pool is now under Royal Patronage, the announcement being made in the current issue of the U.P.A., the official organ of the United Farmers of Alberta. It announces Prof. W. L. Cartwright, the manager of the E.P. Ranch, on behalf of H.R.H. the Prince of Wales, had signed a pool contract covering 1,000 acres.

Human Fly-Robe Arrested

Los Angeles, Calif.—A human fly burglar descended from the roof of the hotel at Alexandria by finger and toe holds, entered the rooms of sleeping guests through the windows, and obtained \$15,000 in cash and jewelry valued at \$15,000. Detectives sold a pin made by fingers and toes in the dust of window ledges were their only clues.

Saved Millions For Empress

Detroit, Mich.—James Edward Smith, 26, of 11000 block of the Ford Motor Company, died Monday after a long illness. Smith saved the company \$36,000,000 in four years by use of a new method to harden steel, according to a statement written by Henry Ford in his autobiography.

THURSDAY, SEPTEMBER 8, 1927

The Mining Congress

The visit of the Empire Mining and Metallurgical Congress is an event of importance and significance to this district. There are some who by their attitude or indifference evidently do not realize the immense resources of the Crow's Nest Pass and its industrial potentialities. The sky to them always has the same leaden hue from a business outlook.

But those who have the vision of greater things and are determined to work for them, realize that the visit of men from all parts of the Empire, interested in mining development and investment of capital, holds out possibilities whereby the potentialities of this region may become known throughout the world.

Striking Beauty at Lower Prices

YOU have seen the New and Finer Pontiac Six on the road! Your attention has been arrested by its beauty of line—by its modish Ducco colorings!

But a closer scrutiny of Pontiac Six will reveal details of beauty and refinement beyond your highest anticipation.

For Pontiac is the Lowest Priced Six in the world to offer the exquisite artistry, the enduring craftsmanship and beauty of "Bodies by Fisher"—to provide a rugged six-cylinder engine of power and performance proved on the General Motors Proving Ground.

Now, Pontiac Six incorporates new items of distinction, such as rich plush upholstery and luxurious interior appointments—at New and Lower Prices. P-5800

This advertisement is not inserted by the Alberta Liquor Control Board, or by the Government of the Province of Alberta

No opportunity should be overlooked to give the visitors as much information as they can absorb. They come to find out things, to be told all about the local conditions in regard to the mining industry, and the people of the towns in this section of the Crow's Nest Pass should accord them as warm and hearty a welcome as possible.

Civic Pride

A town or city reflect the character of its citizens. If they are progressive and striving to improve local conditions, the appearance of the town will indicate it. Stores and buildings will present an inviting appearance, and the general impression given to a visitor will cause him to think favorably of such a place.

Quite often people imagine that conditions are against them. If they lapse into this frame of mind, they themselves are to blame if conditions do not improve. There are too many who always wait for somebody else to start things, instead of getting busy themselves and by their own efforts make an improvement in their own conditions or the town in which they live.

Nothing comes without effort. The laws of Nature never intended that man should live without effort, neither can a town or city progress unless continuous effort is made by its citizens towards better and higher things.

Leadership in movements for progress in any community must necessarily be vested in men of energy and action. They are the men who accomplish things, though very often their efforts are discounted and "knocked" by the people who are only too pleased to share in the benefits that may accrue from the efforts of the workers. Every town has the workers and the drones, the same as the bee-hive, only the bees have an advantage in that they kick out the drones. Towns have to endure them and their croaking and knocking.

It is gratifying to note that the school board has decided to engage an additional teacher for the high school. The new staff will welcome an addition, as well as the parents of pupils. A good education is the best asset we can give to the rising generation.

Remember that every dollar any person sends away to buy goods that can be purchased in his own community at a similar price is gone for ever. Spent in his own community it circulates to the benefit of the community. But many would kill the goose that lays the golden egg.

There will always be two classes of people--those who say it can't be done, and those who go ahead and do it. To which class do you belong?

Here and There

Air mail service between Winnipeg and Fargo, North Dakota, has been inaugurated and the first mail for Winnipeg from the United States arrived recently.

The potato acreage along the Dominion Atlantic Railway last year was larger than last year and a 40 per cent crop increase is looked for. There will likely be 17,000,000 barrels available for export, as compared with 13,200,000 last year.

The United States' interest in the development of the locomotive in Canada is seen in a request by the Baltimore and Ohio Railway to the Canadian Pacific Railway to send one of its latest passenger types of engine to the centenary exhibit of locomotives which will be held at Baltimore on September 24th. The Canadian Pacific has arranged to supply one of its latest types of the "2000" class locomotives, complete with car, for the purpose. This is the company's fastest and most powerful passenger locomotive.

One of the strangest attempts at taking a census is now being made by Andrew Widden of Bella Coola, B.C., according to information received from the Canadian government. Harlan I. Smith of the National Museum of Canada, Mr. Widden is taking a census of the grizzly bear population in some of the virgin woods along the fords which are included in the "Norway of America" traversed on the remarkable journey between Prince Rupert and Vancouver. The coast line between these two ports is a noted big game hunting spot and after making a grizzly bear census each year from all sections of the continent as well as from other parts of the world.

British Columbia's farms produced \$71,862,209 last year; breaking all records and gaining \$6,208,606 over the previous year according to the final figures of the Provincial Statistician, G. H. Stewart. Lumbering leads with agriculture second.

A new world record is set—300 white Leghorn baby chicks arrived from the University of British Columbia to Osoyoos via the Canadian Pacific Express Company, safe, sound, and hungry, all of them. None had feed or water on their 900-mile journey and none died en route.

A barred Plymouth Rock, owned by the University of Saskatchewan, has established a new record for the three Prairie Provinces, laying her 300th egg in just over a year of which she is still in month 10. The world's record for trap-setted production is held by No. 6, an Agassiz, B.C. pullet, which laid 351 eggs in 364 days.

FOR SALE—Five roomed plastered house, good location. This building is the best buy in town at the price. Would yield good return for investment. Apply to the Coleman Journal.

Leosky & Ledieu**Moving Business**

To Better Accommodate Increasing Trade Will Move to Building Formerly Occupied by C. Quimette

The grocery and butcher business of the above firm intend moving shortly into the big store on the corner opposite the Coleman Hotel, as they find that with increased business and the necessity to carry larger stocks, they require more accommodation in order to better serve their growing trade.

This firm has given good service in its respective lines, which has been appreciated by the people of Coleman, and there is no doubt that with improved quarters they will be better enabled to serve their customers.

Through The Journal they wish to express their appreciation of the business extended them by the people of this town, and assure them that no effort will be spared to serve them with the same high quality goods at lower market prices as heretofore. Watch their advertisements each week and take advantage of the prices which they offer.

Piano and Violin Recital Pleased Coleman People

Miss Agnes G. Wyllie, Talented Young Pianist, Appeared With Local Artists Last Wednesday

At the Grand Theatre on Wednesday evening, Aug. 31, the people of Coleman and the Crow's Nest Pass had the pleasure of hearing Miss Agnes G. W. Wyllie of Calgary in a piano and violin recital, which was well attended, people coming from all parts of the Pass to hear this wonderful artiste. It might be mentioned without exaggeration that this is one of the finest musical events that have come into the Pass' nest Pass. All her numbers were well received and after the recital Miss Wyllie was congratulated by several for her wonderful performance.

Special comment is made on the following piano forte selections: "Fantasie and Sonata" by Mozart; "We Two" by Sharpe, and "Fugue in E flat" by Porpora. The playing of these selections showed the marked distinction in the shades of tone also the technique and ability of the artiste. Upon special request by the concert manager, Miss Wyllie sprang a surprise on the audience by playing a selection entitled "Airs of Scotland." Commenting on her violin recital, which was also well received, special note was made of the following selections: "Adoration" by Borowski, "Simple Ave" by Thome, "Perpetuo Mobile" by Bohm and "Valse" by D'Ambrosio. These selections were played with marked ability and perfect intonation. Special comment may be made on the bowing in the selection "Perpetuo Mobile," showing the complete control this artiste had over her instrument. Again Miss Wyllie took the audience by storm by playing "Sometime" by Florio. Praise is given Mrs. Jas. Asbridge for the efficient manner in which she accompanied Miss Wyllie's violin recital.

Assisting Miss Wyllie were the following vocal artists: Mrs. Jas. Asbridge (pupil of Dr. Wadley, of Carlyle Cathedral, England) and Mr. Arthur Hadwell (famous Welsh tenor and gold medalist.) This is the first appearance of Mr. Hadwell in the town of Coleman. Each of these artists rendered three numbers and each was encored, showing them to be artists of ability and possessing fine voices. By request Miss Wyllie accompanied, again proving her ability as an accompanist.

Miss Wyllie's next recital here will be under the auspices of the Soldiers' Memorial Committee, also a tour is being arranged for her through the East and West Kootenay district of British Columbia under the auspices of the Knights of Pythias. She will be managed on this tour by a well known Coleman musician, Mr. Percy J. Locke, K.R.C.S., through whose special efforts a regular tour is arranged. The artistes were introduced by Mr. D. Gillespie, of the Coleman Lodge of Knights of Pythias.

After the receipt a welcome was held in the Knights of Pythias hall in honor of Miss Wyllie and her mother who accompanied her on the visit to Coleman. A dainty lunch was served and dancing carried on until the early hours of the morning.

Swimming Pool Dance

Next Wednesday, Sept. 14, a dance will be held in the Opera house in aid of Coleman swimming pool, to which the public are cordially invited. The usual admission fee will be charged, besides which the holder of the lucky door number will win a prize. The music will be furnished by Mrs. Altermatt's high-class orchestra. Everybody is urged to attend.

United Church Notes

The annual Rally Day services will take place one week earlier this year. The date for the whole country is Sunday, Sept. 26. St. Paul's will keep the day one week earlier in view of other special services in the calendar. This is always a big day in the school and congregation and a special order of service will be used.

At the morning service for the last Sunday in this month Miss Theresa Siegal of Calgary will be present and take part. Miss Siegal is making her first appearance in Coleman as an entertainer on Tues. Sept. 27, under the auspices of the congregation. On the Sunday morning in place of the sermon from the minister Miss Siegal will give a reading of Van Dyke's story, "The Mansion." There will also be a special musical number at the service.

McLaughlin-Buick

1929 Car Carries Many Improvements

68 Major Refinements and Improvements Made in New Models Announced This Week

No less than sixty-eight major refinements and improvements have been made in the 1928 McLaughlin-Buick which have been announced this week by the McLaughlin Motor Car Company, Limited. Running the gamut from modifications in engine design which provides greater and more effortless power to changes in exterior line which increase the streamline appearance of the cars the 1928 improvements more securely substantiate the McLaughlin Buick claim to leadership.

The first thing that strike the eye of the observer is the new car in the latest adaption of the familiar McLaughlin-Buick radiator design, which gives the front of the car a lower and more massive appearance. An apparent increase of length and greater rakishness have been secured by lessening the overall height of the cars by two to three inches.

Ranking next to the spring and absorber unit in importance to the new McLaughlin-Buick's comfort is the deep cushion upholstery.

This is shaped scientifically to fit

Only through an interesting engineering development, pioneered by McLaughlin-Buick engineers, has it been possible to achieve this end without sacrificing headroom, wheel size and road clearance. A new double-drop frame has been designed which gains not only style and safety but added rigidity. With the same headroom, the body is longer, wider, and roomier. The wheel size and road clearance remain the same.

Chief of the engine improvements, which results in a substantial increase of power as well as new silence of operation, is a new McLaughlin-Buick cylinder head, of a spherical type. This gives higher compression with less detonation, causing a greater portion of the fuel to be transformed into useful power. To reduce valve noise to a minimum an entirely new valve mechanism has been developed for the new McLaughlin-Buick.

Most radical of all the changes designed to increase riding comfort is the addition of four hydraulic shock absorbers as standard equipment on all new McLaughlin-Buicks.

The result is said to be easy riding.

Ranking next to the spring and absorber unit in importance to the new McLaughlin-Buick's comfort is the deep cushion upholstery. This is shaped scientifically to fit

the lines of the body.

McLaughlin's combined Due colors, emphasizing the stylish low contour of the car and repainted with heavy nickel on radiator, bumpers, lamps and trim, this is the exterior of the McLaughlin-Buick for 1928.

Many other improvements, and adjustable steering wheel and convenient grouping of lubrication points make the 1928 McLaughlin-Buick the last word in motor car design.

Mrs. King Entertained

The Thursday Afternoon Card Club enjoyed a charming luncheon at the home of Mrs. Robert King at Camarillo last Thursday, which was served most attractively at three small tables.

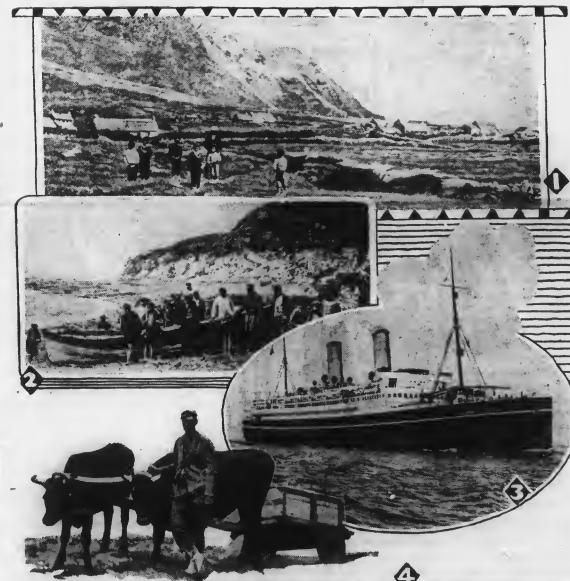

The first and second prizes were won by Mrs. Charles Aggen and Mrs. George Doty, while the guest prize was awarded to Mrs. Longbury of Coleman, Alberta, who with her daughter, Mrs. Alex Easton, were guests of Mrs. King.—Oxford Courier.

Copies of the Journal may be secured at the drug store of H. C. McBurney.

The Forgotten Island of Romance

1.—The Settlement at Tristan da Cunha. 2.—The only access to the sea.

3.—Canadian Pacific Empress of France.

of the more restless ones among them, the present colony of 140 souls has

The people are self-governing and sea-going and self-supporting. The men are daring seamen and clever carpenters and masons, but clever to a degree, the primitive abodes showing the picturesque bullock-carts, and the cottages built of huge blocks of stone.

Physically the island is entirely of volcanic origin. High cliffs circle the lonely spot, and are pierced with ravines, the walls rising like ramparts from the sea, to a height of 1,000 feet. They are topped by a central cone that stands out amid the surrounding cliffs at an altitude of 5,000 feet, and is as symmetrical as the Peak of Teneriffe. Here, in the largest crater, is a fresh-water lake, which, according to legend, is the ocean in miniature.

The continuous occupation of Tristan da Cunha began, however, in 1815 when a party of British sailors of the garrison, William Glass, of Kelso, a corporal in the Royal Artillery, was at his own request left on the island to care for the 100 or so whalers who had been induced to join them. The real discoverer of the island was a Portuguese whaler named Pedro Jose, who had been shipwrecked on the island in 1815.

From the tiny settlement founded by Glass, which was increased from time to time by abandoned mariners and a few settlers from Cape Town, and diminished again by the exodus northwest of the island—a narrow plateau across to the sea—the only access

to the island is the narrow

pathway leading to the

settlement.

There's a "Nugget" shade for every shoe made.

WORLD HAPPENINGS BRIEFLY TOLD

The first taxi cab appeared in the streets of Jerusalem recently. It costed a vast amount of currency.

An invitation to visit Calea to promote aviation has been extended to Col. Charles A. Lindbergh, New York. Paris flier Lindbergh said he might accept.

More and better immigration for Canada is the prospect for 1925. W. J. Egan, deputy minister of immigration, declared on his return from a European tour that lasted more than three months.

Viscount Cecil, of Chelwood, has definitely resigned his cabinet post as chancellor of the Duchy of Lancaster, and will not go to Geneva for the meeting of the League of Nations Assembly.

Arthur Joseph Noel, the fourth Earl of Ganthorpe, private chaplain of St. Louis and Cape to Pope Benedict XV, and Pope Pius XI, and former attaché at the British embassy at Washington, died Aug. 27. He was 43 years old.

The Sudders Settlement Board, which has handled the placing of returned men on the land, will be incorporated in the Land Settlement Board in the Department of Immigration, reports Hon. Robert Pofko, minister of immigration and colonization.

For having set fire to a stack of hay containing about 32 loads belonging to his employer, a young man from the Old Country, was sentenced at Winchester, Ont., to serve one year in the Gauch reformatory.

The University of Toronto, conferred its highest honor, the degree of Doctor of Laws, honoris causa, upon Rt. Hon. Lord Irwin, the viceroy, stated in addressed the legislative assembly at Simcoe Hall.

Between 250 and 300 people have been killed and more than 2,500 injured in less than 18 months past as a result of religious conflicts between Hindus and Moslems in various parts of India. Lord Irwin, the viceroy, stated in addressed the legislative assembly at Simcoe Hall.

John B. Simpson, a British scientist, has left Edinburgh, Scotland, with the intention of making his home in an iceberg for three months. "He was accompanied by a Samoyede dog. "My purpose," said Simpson, "is to gather material for a book on the ice fields."

A Valuable Hen

An offer of \$1,000 for the famous hen No. 6 or \$3,000 for a pen of ten birds including this world record layer was turned down by the University of British Columbia on account of the great value of the bird for breeding purposes.

Buildings lined with wood are better for reproducing sound than those with wall of other material.

A bluish is one of the few things that cannot be counterfeited.

Diarrhoea Summer Complaint HE ALWAYS USES

Mr. T. F. McGregor, McLean, Alta., writes: "Over forty years ago my mother used to give me Dr. Fowler's Extract of Wild Strawberry to cure diarrhoea and constipation. All these years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few drops of the same oil. It has always been and always seems to have the desired effect, no matter what the cause."

Don't Forget a Small Life

The valuable preparation has been on the market for past 20 years; put up only by the T. Miltours Co., Limited, Toronto, Ont.

Treasures Hidden In Desert

Many Cities Buried Under Drifting Sands During Centuries

It is not generally known that the Sahara Desert has encroached hundreds of miles eastward during the centuries since the great days of Egyptian civilization, and has in consequence buried in sand many forgotten cities and towns of population. One of the chief causes of the encroachment on the floor of the desert, but the cause buried under desert sands must also be insatiable.

A sensational discovery was made recently, not on the Egyptian side, where the sand almost succeeded in overwhelming even the mighty Sphinx, but on the western side of the desert. The body of some ancient Queen of the Sabata was found beneath the sand. On her arms were eight bracelets, three of gold and five of silver; necklaces of jewels were round her neck and on her head was a diadem of gold studded with jewels.

There was much exquisitely carved furniture in the tomb, and near by were piles of jewels—emeralds, rubies, onyx, and so on. On the opposite side was found a superb statue of a woman carved in stone. The date of this tomb is placed at least a thousand years before the Christian era.

Motor Penetrates Far North

English Women Brake Distance Record By Motor

Two British motorists have just achieved the fact of breaking the "farthest north" record in a motor car, were turned back when 270 miles within the Arctic circle by swampy conditions, arising from the intense heat.

The Hon. Mrs. Victor Bruce and party, who have returned to London after a 6,000 miles' trip through Northern Europe to Finland and Lapland, went ahead of all others to the North Pole than any previous motorist has penetrated, and got within 40 miles of the North Cape.

They averaged 270 miles a day for 28 days, some of the journey being over rough tracks in Northern Scandinavia. The enterprise was undertaken partly with the object of inspecting the roads of Sweden on behalf of the Automobile Association, and partly for the sake of adventure.

Mrs. Bruce was accompanied by her husband (a son of Lord Aberdare). "One of my great ambitions," said Mrs. Bruce, "was to be able to say that I enjoyed a bath in the Arctic Ocean, but the swamps in Northern Lapland prevented us from getting to the coast at all. We were fully prepared for cold very weather, but actually the average temperature in the Arctic areas which we traversed in about 90 degrees in the shade, at this time of year."

"It is most strange, when you think of it, if the sun never sets in summer in these latitudes. It is most remarkable to observe the extent to which the motor is penetrating into the Far North of Europe, and I anticipate that within a very few years roads will be available for our tourists right up to the North Cape."

Irish Free State Issuing New Coins

Design Of Young Yorkshireman Won In World Competition

From designs submitted by leading sculptors from all parts of the world, that of Mr. Percy Metcalfe, a young Yorkshireman, has been accepted by the Irish Free State Government for the new coinage.

A hon. a sow, a harp—to illustrate the food-producing power of the Irish Free State—and a salmon—which is symbolic of an old Irish legend relating to the fish which swam in the "sacred well"—all had to be worked into the winning design.

Mr. Metcalfe, who is being given sittings daily by King Paul in connection with a position in which he has been appointed to the Royal Mint, said that his little success was "his greatest yet." Competitors against him were drawn from all parts of the world, and included the famous Serbian sculptor, Matrycyle.

The designs are eight in number, from half a crown to the farthing. In size, they will be identical with the British coinage.

After the sessions of the League

he and Dr. Canfield will visit many

parts of Ireland and Great Britain

and England for the purpose of investigating the progress made in the past few years in the treatment of lignite and bituminous coal for by-products in Germany.

Producers in Germany claim that

they can secure oil from coal at a

less cost to them than crude oil.

"Me goodness!" said a friend,

"How can you wear a fur in the summer?"

"Well," replied the dandy, "the animal who wore it originally need it in the summer, didn't he?"

First Shipment Of Antelope

The first shipment of antelope from Canada to the U.S. will be made at an early date, Charles Blazer, rancher, at Lake Newell has contracted to deliver 22 head of antelope to a Texas banker.

The shirt, having two box plats in front and gathering at the back, is joined to a bodice. Size No. 13 is 16, 18 and 20 inches. Size 12 (36 bust) requires 1½ yards 36 or 35-inch material and ¾ yard 36-inch lining for bodice top. Price 20 cents the garment.

The designs illustrated in our new fashion book, "Modern Styles for the Home Dressmaker" and the book for girls who desire to wear garments dependable for taste, simplicity and economy will find their desires fulfilled in our patterns. Price of the book 10 cents the copy.

SOLOMON DEDICATES THE TEMPLE

Golden Text: "I was glad when they said unto me, let us go unto the house of Jehovah."—Psalm 122:1.

Lesson: 1 Kings 8.

Continental Reading: Psalm 122.

Explanations and Comments

I. The Great Procession With the Ark and the Tabernacle, verses 1-5—It was during the Feast of Tabernacles, which began on the fifteenth day of the month of Tisri, or September 21, in the year 445 B.C. (Lev. 23:34), that the elders of Israel and all the heads of the tribes gathered up the ark of the covenant for the second time to meet at the Pacific Ocean next autumn. It is believed that the chance of such a flight taking place or of Japanese airmen or machines being ready for 12 months is small.

The doleful facts are that Japan possesses no aeroplane capable of making the journey and has no pilot, civil, military or naval, with the necessary skill and technical ability. A necessary plane might be bought but public opinion realizes that half the honor would be lost by such a pre-emptive strike.

The status of aviation in Japan is correctly reflected by the fact that Japan's record for continuous flying is only 11 hours, while two hours is the record for night flying.

The best Japanese achievement hitherto, and the only one of international note, is the 1925 flight to London via Siberia made by two Chinese fliers.

Among the reasons advanced for this failure are the following: First, that Japan's backwardness has plenty of courage but lack the initiative and that enthusiasm for the art of flying which characterizes Lindbergh, Chamberlin and Erwin. Secondly, the Japanese seem "unmechanical" and lack "engine sense." For example, they often fall to notice when their motor starts misfiring. Thirdly, official regulations hamper practice, for the air above Japan is said to be unusually tricky, thin and full of holes of variable quality. These facts reveal how much remains to be done before a Japanese aviator can bring his way to Seattle.

"There is something repulsive to us," said the Japanese, "but it is a noble side to such a心脏 of slaughter. Barbecue it was, but devotional also. Before we lay them we have to be sure to give them a fiery and delicious meal, and then set them to the bone they would show Jehovah."

"There is something repulsive to us,"

said the Japanese, "but it is a noble side to such a心脏 of

slaughter. Barbecue it was, but devotional also. Before we lay them we have to be sure to give them a fiery and delicious meal, and then set them to the bone they would show Jehovah."

SHIP YOUR GRAIN TO McBEAN. BROS.

Write us for information regarding the markets. We will say now that so far as we can see the world's conditions warrant high prices for this year's crop, and if your wheat is handled intelligently we can see no reason for the farmers taking less than \$1.50 a bushel, and the possibilities are for a great deal higher price. The big shortage in the corn crop in the United States is a very bullish factor for our course grain. Give us a trial. We are licensed and bonded. Reference: Bank of Nova Scotia.

PAINTED FIRES

BY NELLIE L. MCCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VII.—Continued

Every seat in the courtroom was filled. It is not every day such a stirring case can be offered to the unemployed public. A young girl, pretty and well-dressed, found in a Chinese den with herons tablets in her possession, who resisted arrest, fighting like a wild cat, inflicting an officer, and now refusing to say a word, is no ordinary attraction.

The gallery, reserved for the purpose, swarmed with anxious spectators. There was going to be a great show. Men with black whiskers showing through the skin of their faces, and black hats with feathers, some dancing, laughing, hairy, cheery, sturdy youths, plenty of face; stooping, shoulder'd older men with veins on, and hairy locks, turned down to the butt like old elopers; garnished women, excited and strident, the boudoir cap type, hungry for sensations, the tattered old ladies; fat dwellers, bargain hunters, can openers, secure in their law-abiding virtue, they came crowding in, hungry and jostling. Their liberty was sweet to these women this morning when contemplating the prospect of another woman's possible loss. It gave them that pleasant thrill of comparative virtue.

The Press table was full. It looked like a heart-interest story, a real thrill stuff—hotly, but misguided youth.

Hebil's case was the first entered. The police matron brought her in and sat with her. Her face was pale, but there was no shrinking or fear in her eyes, and the eager crowd, whose eyes were fixed on her noticed that she anxiously searched for someone. Her friend would have come if she were well enough, she thought, and again she ran, knifed, crying the entire time, and weeping, and carrying out the very first favor her dear friend had asked her to do, who would know, though, that it was through no fault or carelessness of hers. Maybe she had died of lack of that medicine they had taken away from her. Maybe her dear friend had died—and there was no one she could ask. She must not ask—that was the trouble in her heart as she faced the crowd with its hundred, eager searching eyes.

Under a glass roof, suspended by many chains from the ceiling, sat the magistrate, austere, exacting, and stern. The Flim girls would refuse to understand his decisions. He would put something of the fear of the law into her. These Flim girls! he knew well, hadn't he had enough trouble with them?

TO WOMEN OF MIDDLE AGE

Mrs. Wilson's Experience a
Guide to Women Passing
through the Change of Life

Hamilton, Ontario.—"I have taken several bottles of Lydia E. Pinkham's Vegetable Compound and I cannot speak highly enough of it as I went through the Change of Life and was in poor health. I had no appetite, I was very weak and sick, and the pain in my bones were so bad I could hardly move. I got very ill at times and thought I was failing on earth. I did not care if I lived or died. I was very nervous, too, and did not go out very much. I advised my doctor to prescribe a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I am a farmer's wife, and always had until recently been well for two months. I began to feel like a new woman after the first bottle and I recovered completely. I am still in good health and have no relapses. Lydia E. Pinkham's Liver Pills. I am willing to accept letters from women asking about this medicine and will speak to many of them."—Mrs. EMMA WILSON, 471 Wilson Street, Hamilton, Ontario.

Sold by druggists everywhere.

Times and thoughts of failing friends on earth. I did not care if I lived or died. I was very nervous, too, and did not go out very much. I advised my doctor to prescribe a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I am a farmer's wife, and always had until recently been well for two months. I began to feel like a new woman after the first bottle and I recovered completely. I am still in good health and have no relapses. Lydia E. Pinkham's Liver Pills. ours reforming the world, and the girls on the streets, or in their clubs, I think the club life of this city for the devilment that goes on among the young people, for the home has gone. I tell you, there's no religion in the homes any more, no respect for law—not birth control clubs, political clubs, bridge clubs, while the young girls and boys steal cars, joy ride and stuff dope. There you are!"

The cliff dwellers were enjoying it. They did not belong to the women's organizations, so he didn't mention them.

Mr. Terry came forward and asked if he might give evidence.

"This girl's mother" cannot be blamed," he said, "she is dead. Helml has been here only a few months. If our society is in the state you say—"

"Give our evidence, Sir," interrupted the magistrate, "this is a court of law—you are not preaching, remember."

"The girl is doing an honorable thing," concluded the minister. "She is suffering for some other person's misdeeds. She must have gone to San's place for someone, I know the girl; she is honest and innocent."

"Let her speak, then. No one is stopping her. Let her clear herself."

"It would be an iniquitous thing to send this girl to jail, where she will associate with evil women. I plead for mercy. She should be allowed to tell us the whole story."

"What is your name?"

The interpreter spoke to her.

"Helml Milander," she answered.

"Yes, that name is well known in this court—I had the pleasure—painful duty not long ago of sending Anna Milander to jail for a similar offence attacking a policeman. Have you a sister named Anna Milander?"

When the interpreter put the question, Helml admitted that she had but not knowing what the magistrate had said, said, "She is not here, the implication."

The interpreter did not give her all that he had said.

Miss Rodgers was on her feet in a moment. "Your Worship—" she began.

The magistrate ordered her to sit down.

"I demand to be heard," said Miss Rodgers, "an injustice is being done to this girl."

"All in good time," said the magistrate sternly. "You will get a chance to speak, but you cannot interrupt this court."

"There were murmurs in the gallery, "Give her right to be set in her place!" "Gee, doesn't Margarette Windsor know how to handle a case. No one can put anything over on him!" The plump face-lifters were having a positive thrill. They glowed with pride. The girls with Anna Milander's pale face with its proud defiance. She would get info as sure as she was an inch high, and when she came out she couldn't pull that stuff on them. Girls just out of school were not so uppity; they were glad to have anyone show them around. They nudged each other.

"Now, I want you to know," the magistrate said, "and I am speaking in a long-distance voice. He seemed to think it spoke loudly the most must understand—when are either an old hand at this business, young and innocent as you look, or you're hiding someone. You must speak. Just say the name of the person who sent you to San's for dope."

Again the Interpreter spoke to her and the crowd waited.

Helml spoke her head.

The spell broke at that, and the gallery relaxed. A rustle of whispers crept over it like a gust of dry leaves.

"I commanded the magistracy, and again the tightening came in the Court. The air was heavy with unrestrained humanity, primping, feet, bad breath, scented soap. Out-side wagon rattled by, street cars clanged.

"Has any person anything to say?" asked the magistrate, looking wistfully at Miss Rodgers, who came for ward.

"Give your name," commanded the magistrate stiffly, "and be brief."

"This young girl has lived in our neighborhood for two months, and bears a good character," said Miss Rodgers. "She belongs to a girl's club or some other club, I believe. Women and girls have too much time on their hands, and they're going to the devil. They don't work any more—they just grad around to picture shows and get into trouble, and the women's organizations encourage them instead of trying to restrain them. The old-fashioned girl stayed at home and worked with her mother. But now the mothers are

out reforming the world, and the girls on the streets, or in their clubs, I think the club life of this city for the devilment that goes on among the young people, for the home has gone. I tell you, there's no religion in the homes any more, no respect for law—not birth control clubs, political clubs, bridge clubs, while the young girls and boys steal cars, joy ride and stuff dope. There you are!"

The cliff dwellers were enjoying it. They did not belong to the women's organizations, so he didn't mention them.

Mr. Terry came forward and asked if he might give evidence.

"This girl's mother" cannot be blamed," he said, "she is dead. Helml has been here only a few months. If our society is in the state you say—"

"Give our evidence, Sir," interrupted the magistrate, "this is a court of law—you are not preaching, remember."

"The girl is doing an honorable thing," concluded the minister. "She is suffering for some other person's misdeeds. She must have gone to San's place for someone, I know the girl; she is honest and innocent."

"Let her speak, then. No one is stopping her. Let her clear herself."

"It would be an iniquitous thing to send this girl to jail, where she will associate with evil women. I plead for mercy. She should be allowed to tell us the whole story."

The interpreter spoke to her.

"Helml Milander," she answered.

"Yes, that name is well known in this court—I had the pleasure—painful duty not long ago of sending Anna Milander to jail for a similar offence attacking a policeman. Have you a sister named Anna Milander?"

When the interpreter put the question, Helml admitted that she had but not knowing what the magistrate had said, said, "She is not here, the implication."

The interpreter did not give her all that he had said.

Miss Rodgers was on her feet in a moment. "Your Worship—" she began.

The magistrate ordered her to sit down.

"I demand to be heard," said Miss Rodgers, "an injustice is being done to this girl."

"All in good time," said the magistrate sternly. "You will get a chance to speak, but you cannot interrupt this court."

"There were murmurs in the gallery, "Give her right to be set in her place!" "Gee, doesn't Margarette Windsor know how to handle a case. No one can put anything over on him!" The plump face-lifters were having a positive thrill. They glowed with pride. The girls with Anna Milander's pale face with its proud defiance. She would get info as sure as she was an inch high, and when she came out she couldn't pull that stuff on them. Girls just out of school were not so uppity; they were glad to have anyone show them around. They nudged each other.

"Now, I want you to know," the magistrate said, "and I am speaking in a long-distance voice. He seemed to think it spoke loudly the most must understand—when are either an old hand at this business, young and innocent as you look, or you're hiding someone. You must speak. Just say the name of the person who sent you to San's for dope."

Again the Interpreter spoke to her and the crowd waited.

Helml spoke her head.

The spell broke at that, and the gallery relaxed. A rustle of whispers crept over it like a gust of dry leaves.

"Has any person anything to say?" asked the magistrate, looking wistfully at Miss Rodgers, who came for ward.

"Give your name," commanded the magistrate stiffly, "and be brief."

"This young girl has lived in our neighborhood for two months, and bears a good character," said Miss Rodgers. "She belongs to a girl's club or some other club, I believe. Women and girls have too much time on their hands, and they're going to the devil. They don't work any more—they just grad around to picture shows and get into trouble, and the women's organizations encourage them instead of trying to restrain them. The old-fashioned girl stayed at home and worked with her mother. But now the mothers are

out reforming the world, and the girls on the streets, or in their clubs, I think the club life of this city for the devilment that goes on among the young people, for the home has gone. I tell you, there's no religion in the homes any more, no respect for law—not birth control clubs, political clubs, bridge clubs, while the young girls and boys steal cars, joy ride and stuff dope. There you are!"

The cliff dwellers were enjoying it. They did not belong to the women's organizations, so he didn't mention them.

Mr. Terry came forward and asked if he might give evidence.

"This girl's mother" cannot be blamed," he said, "she is dead. Helml has been here only a few months. If our society is in the state you say—"

"Give our evidence, Sir," interrupted the magistrate, "this is a court of law—you are not preaching, remember."

"The girl is doing an honorable thing," concluded the minister. "She is suffering for some other person's misdeeds. She must have gone to San's place for someone, I know the girl; she is honest and innocent."

"Let her speak, then. No one is stopping her. Let her clear herself."

"It would be an iniquitous thing to send this girl to jail, where she will associate with evil women. I plead for mercy. She should be allowed to tell us the whole story."

"What is your name?"

The interpreter spoke to her.

"Helml Milander," she answered.

"Yes, that name is well known in this court—I had the pleasure—painful duty not long ago of sending Anna Milander to jail for a similar offence attacking a policeman. Have you a sister named Anna Milander?"

When the interpreter put the question, Helml admitted that she had but not knowing what the magistrate had said, said, "She is not here, the implication."

The interpreter did not give her all that he had said.

Miss Rodgers was on her feet in a moment. "Your Worship—" she began.

The magistrate ordered her to sit down.

"I demand to be heard," said Miss Rodgers, "an injustice is being done to this girl."

"All in good time," said the magistrate sternly. "You will get a chance to speak, but you cannot interrupt this court."

"There were murmurs in the gallery, "Give her right to be set in her place!" "Gee, doesn't Margarette Windsor know how to handle a case. No one can put anything over on him!" The plump face-lifters were having a positive thrill. They glowed with pride. The girls with Anna Milander's pale face with its proud defiance. She would get info as sure as she was an inch high, and when she came out she couldn't pull that stuff on them. Girls just out of school were not so uppity; they were glad to have anyone show them around. They nudged each other.

"Now, I want you to know," the magistrate said, "and I am speaking in a long-distance voice. He seemed to think it spoke loudly the most must understand—when are either an old hand at this business, young and innocent as you look, or you're hiding someone. You must speak. Further Donations to Coleman War Memorial

Contributors to the War Memorial Fund in addition to the list published in the issue of August 11 are as follows:

Calgary Brewing Co. Ltd.	\$25.00
F. J. Lotte	5.00
A. M. Morrison	5.00
Harry Clark, sr.	2.00
Previously acknowledged	359.00

Total 396.00

P. Smith, secretary-treasurer of the War Memorial committee, states that any business men or others who have not been approached and who wish to subscribe towards the war memorial fund, may hand him their donations, which will be deposited in the trust account in the Bank of Commerce for this purpose. All subscriptions will be acknowledged in the Journal.

A meeting of the committee will probably be held next Wednesday, to further discuss plans for the erection of the memorial.

"Beau Geste" Coming to Palace Theatre Sept. 16-17

Announced as the supreme motion picture of all time, this wonderful picture will be presented at the Palace Theatre next week. The picture is based on Major P. C. Wren's baffling romance of the San Juan desert, and represents a part of the life of the famous Foreign Legion, one of the most romantic and adventurous bodies of men in the world. In it dead men stand to arms, the fallen are spiritized away and a fortress disappears in fire. It has shown at prices from \$1.50 to \$2.50 in the larger cities, and will show in Coleman at the usual admission price.

The Importance of Advertising In The Journal

The progressive and aggressive business man advertises and builds business and goodwill by so doing. In that way he combats the inroads of mail order business, and shows the people in his home town that he is anxious to secure their business.

People are attracted to a store that advertises its wares and there are many advantages gained by advertising that do not appear on the surface. If a store-keeper will see each week that his advertisement appears in his local paper he will be contributing very materially to the development of his own business.

Coleman people look in The Journal for news of the stores as well as the news of their neighbors. The store that does not advertise is missing its opportunity of adding to its business.
